Reasons For Allowance

1. The combination as claimed wherein an apparatus comprising a data input having personal body information being entered using said data input device while the person under test stands on said weight meter and a weight sensor connected to a CPU is not disclosed, suggested, or made obvious by the prior art of record.

Yoshihisa et al. (JP 11-113871) discloses an apparatus for carrying out weight and impedance measurements to provide information about a body balance (Fig. 1). However, Yoshihisa et al. does not disclose entering personal body information while the person under test stands on said weight meter after measuring the weight. Fig. 6 shows that the data entry is done in steps (S2, S3) which is performed before the weight measurement step (S8).
